### PRODUCT DESCRIPTION

This is a rare example of the low-rolling coffee table model #6048T designed by Joseph D'Urso for Knoll in 1981.

This table is in excellent condition in a rare factory-ordered tomato red finish over stainless steel with the original wire safety glass top.

The table is very substantial but is easily moved throughout the room with its recessed casters.

The matching side tables model 6022T are available separately.
