PRODUCT DESCRIPTION

A vintage pair of Verner Panton "Flower Pot Series" wall mount sconces designed for Louis Poulsen. The cord can be extended to allow the flower pot to be lowered to a different position. The arches can also be easily rotated in the mount to change the position of the light. Both fixtures retain the original cords and in-line switches.

The original wall mount hardware is included and the chrome is in very good condition.

Unmarked. 1960s.
